

AEL Solutions Awning Information Sheet

Heavy duty acrylic fabric: Resistant to fade, stain and mould.

The compact S8130 Awning is based on proven triangular back bar technology. Together with its universal fixation brackets, this enables wall or top fix or installation on rafters, even in restricted spaces.

A special arm-bracket combination allows projections up to 4 metres. The Awning distinguishes itself by the special visual appearance of its straight telescopic arms and the perfect fabric tensioning in every position.

Options such as an electric drive weather sensors for sun, wind and rain and remote control provide even greater convenience for this model.

Fully cassetted when retracted, depending on model

Sprung loaded Supporting Arms maintain tension

Art work can be printed on to any valence or panel

Proven technology – triangular back bar for easy wall or top fix

Perfect fabric tensioning

Versatile incline adjustment
